

A world map illustrating the global distribution of the genus *Pterodroma*. The map uses a color scheme where blue indicates countries with recorded species, and grey indicates countries without. Blue-shaded regions include Canada, the United States, Mexico, Argentina, South Africa, Australia, Japan, and a cluster of countries in Europe including the United Kingdom, Ireland, France, Germany, Poland, Czech Republic, Slovakia, Hungary, and Romania. All other landmasses, including Russia, China, India, and most of Africa and South America, are shown in grey. The map includes a black border and a white background.
